

## Circular

### CLECAT Circular 2020/067

26 March 2020

Dear Members,

Following the request from a number of members, discussion at yesterday's Road Institute meeting and further comments received from you, we have finalised the list of specific recommendations on handling goods at loading and unloading sites, designed for both consignors and consignees, as well as drivers and hauliers, in the wake of COVID-19 outbreak.

The [joint ESC-CLECAT recommendations](#), which you will find attached to this Circular, are in line with the recently published European Commission's guidelines and the Danish industry recommendations. In summary, ESC and CLECAT encourage the supply chain partners to ensure the availability and accessibility of the necessary basic facilities and equipment for the drivers at loading and unloading sites, as well as respectful cooperation and better coordination between the parties.

We encourage you to give these recommendations wider circulation, possibly in your own language, and to refer to them in your own communications.

Kind regards,

Migle  
Policy Manager

Bluseviciute
